

## Environmental Policy

Suprafil Group designs, manufactures and installs aerations systems for the biological treatment of municipal sewage and industrial wastewater through Suprafil Limited, supplies Stainless Steel pipework, pressure vessels and general Stainless Steel fabrications through Suprafil Fabrications.

**We are committed to minimising the environmental impact of our activities and aim to continuously improve our environmental performance by:**

- Reducing the environmental impact of our work in the offices, workshop and on site and their effects on the local community by adopting reasonable controls for minimising, air, waste, water and noise pollution, and keeping our premises clean and tidy.
- Addressing the environmental risks of the work that we carry out and continually monitoring the significant aspects of our environmental performance.
- Annually setting environmental objectives and targets, and continually looking for ways in which to improve our environmental performance and reduce our environmental impacts.
- Ensuring that all of our employees and sub contractors are trained and aware of our environmental commitment and policy, and that they promote any ways in which we can improve.
- Making use of opportunities to minimise waste and reuse or recycle material.
- Ensuring that all sub-contractors adopt the environmental procedures, policies and management systems of the individual sites they are working on.
- Monitoring, reviewing and complying with environmental legislation, regulations and other requirements that are relevant to our operations.
- Encouraging communication with local businesses and residential communities who have an interest in our environmental policy, plans and performance.

**We request that all staff and sub-contractors respect our commitment to this policy and request their participation and contribution to achieving the company objectives and targets and adopting a continuous improvement philosophy.**
