

CASE STUDY

Itchen Bank

The issue

Upgrade required

Suprafil were asked to upgrade a liftable grid in an oxidation ditch at Itchen Bank along the banks of the river Itchen in Warwickshire.

The solution

Improved technology

Suprafil installed a liftable grid in an oxidation ditch, featuring PTFE coated membranes.

The result

Significant energy savings

The completed £200,000 project to upgrade the surface aerators, saw a significant energy saving for delivery contractor Costain, on behalf of Severn Trent Water.
