

CASE STUDY

# Ilkeston

## The issue

### Degrading system

Suprafil was asked to remove an old ceramic disc system at the WWTW in Derbyshire.

## The solution

### Highly efficient solution

Suprafil replaced the old ceramic disc system with new high-efficiency plate diffusers.

## The result

### Tight installation

The £200,000 project was installed and completed within a very tight programme duration for client Severn Trent Water, for delivery contractor Nomenca.
