

CASE STUDY

West Walton

The issue

Overloaded

Installation of liftable grids to upgrade the existing oxidation ditches at the Norfolk WwTW to allow it to cope with the full works flow.

The result

Energy Savings

The client, Anglian Water, also saw a large energy saving on completion of the £600,000 project.

The solution

No disruption

Completed in two phases, the live installation was completed without draining the tanks or interrupting the tanks.
